Climatic and Geographic Design Criteria Lancaster County

For municipalities located in Lancaster County and administered by Light-Heigel & Associates, Inc., new construction and alterations must adhere to the following climatic and geographic design criteria:

| Ground Snow Load(1) | Wind Speed (mph) | Seismic Design Category | Concrete Weathering | Frost Line Depth(1) | Termite | Decay |
|---------------------------|------------------------|-------------------------------|------------------------|---------------------------|----------------|--------------|
| 30 psf | 90 | B | Severe | 40" | Moderate To | Slight To |
| | | | | | Heavy | Moderate |

| Winter Design Temp. | Ice Shield Underlayment Required | Flood Hazards | Climate Zone | Radon Potential | Air Freezing Index | Mean Annual Temp. |
|---------------------------|--|----------------------------|-----------------|--------------------|--------------------------|-------------------------|
| 0 Deg. Fahrenheit | Yes | Check with Municipality | 11 B | High | 1000 | 55 |

(1) Set by local jurisdiction.

Note: Use Soil Load-bearing value of 1,500 psf for footing design unless a formal Geo-Technical Report indicates otherwise.
